

Energy and Climate Change (EC)

Impactful university program(s) on climate change

	
<p>“5th International Environmental” forum (Tanta University, Egypt)</p>	<p>“Greenhouse Gases” training course (Tanta University, Egypt)</p>

Description:

Tanta University offers impactful programs to spread awareness about the areas and aspects of climate change such as climate change risks, impacts, mitigation, adaptation, impact reduction, and early warning.

1- Tanta University has organized 5th International Environmental forum for discussing climate change and its impact showing technological development and how to use it for solving the problems of the environment and promoting an integrated and sustainable ecosystem that promotes flexibility and resilience to face natural hazards and reduces the effects of climate change; And create tools that quickly help deal with environmental threats.

2- The Center for Environmental Science and Technology at Tanta University offers training courses in all fields and aspects of climate change to spread awareness about it in the surrounding communities and at the national level.
