

## Waste (WS)

### Inorganic Waste Treatment

Inorganic waste treatment (Tanta University, Egypt)

Inorganic waste treatment (Tanta University, Egypt)

Recycling Metal Cans (Tanta University, Egypt)

Recycling Electronic waste (Tanta University, Egypt)

**Description:**

Tanta University launched and implemented three programs for waste treatment around the university. These programs meet the university's goal for achieving sustainability inside its campuses.

These programs are as follows:

1- Tanta University implemented a waste separation program using waste separation containers to reuse plastic, paper, metal in recycling operations.

2- Tanta University implemented an innovative program for recycling empty metal cans to produce alum. This contributes to the university's goal for reusing and reducing metal waste.

3- Tanta University implemented a program for recycling electronic waste to reuse it for designing artistic works. This also achieves the university's goal for reducing electronic waste.
