

Transportation (TR)

Number of Transportation Initiatives to Decrease Private Vehicles on Campus

Shuttle service (Tanta University, Egypt)

Zero emission shuttle service (Tanta University, Egypt)

Cycling Event (Tanta University, Egypt)

Description:

In line with Tanta University aim to reduce greenhouse gas emissions resulting from fossil fuels inside the university campus, therefore it adopted 3 initiatives concerning about decreasing private

vehicles on campus.

These initiatives are as follows:

1- Tanta University provides shuttle service to transport administrative and faculty staff to and from campus with 45 shuttles owned and operated by it which is very effective for decreasing private vehicles on university campus.

2- Tanta University provides zero emission shuttle service for commuting population between places around campus instead of using their private vehicles.

3- Tanta University organizes cycling events to encourage campus population for riding bikes which could decrease private vehicles on campus.
