**Description:**

Believing in their role in serving the community, Tanta University encourages its students to participate in various activities, initiatives and projects launched by the university to serve the community. As a result, Tanta University students had an effective and notable participation in 6 initiatives and projects launched by the university to serve the community, whether at the local or national level.

The following are sustainability community services projects and initiatives in which Tanta University students

participated to serve the community:

1- Tanta University students participated in the Decent Life project, which aims to organize comprehensive environmental convoys for the people of the most needy villages from inside or outside the governorate.

2- Students of medical colleges at Tanta University participated in Health For All initiative which implements medical convoys to provide free medical services for local community and also national people outside the governorate

3- Tanta University students participated in 100 Million Tree initiative to increase the number of planted trees and expand green areas in the places around the university in the villages and regions where the local community live.

4- Tanta University students participated in Egypt Without Illiteracy project which was launched by the university to eradicate illiteracy, as university students had an effective and successful contribution to eradicating illiteracy among many members of the local community.

5- Many Tanta University students volunteered in Differently Capable initiative, which aims to provide all services to people with disabilities in the local community.

6- Tanta University students participated in Children's University project , which aims to spread awareness among children about environmental and sustainability issues and also engaging them in activities inside university campuses.

Number of sustainability community services project organized and/or involving students in 2022 = 6 projects.
