### Number of Events Related to Sustainability

### Activities of the Sector

#### Environmental Convoys Related to Sustainability (Tanta University, Egypt)

100 million Tree Initiative (Tanta University, Egypt)

International Environmental Forum (Tanta University, Egypt)

#### Description:

Based on its societal responsibility towards environmental and sustainability issues, Tanta University has

implemented many environmental campaigns and convoys to serve the community and has also organized some events related to the environment and sustainability, whether at the local or international level.

Tanta University has organized and implemented hundreds of comprehensive environmental convoys for the community within the Decent Life Initiative to spread awareness of environmental and sustainability issues and provide environmental, medical, and veterinary services, whether to villages located near the university or those located in other governorates.

Tanta University also adopted the 100 Million Trees initiative to increase the number of planted trees and expand green areas, whether inside or outside the university campus, as the university has so far succeeded in planting 1,750 trees and 2,520 square meters of green areas.

Tanta University also hosted and held an international conference to discuss the latest developments in scientific research in the fields of environment and sustainability and to propose scientific solutions to confront climate change.

Total number of sustainability/environment related events in the last three years:

2020: 41

2021: 165

2022: 476

The **average** per annum of sustainability/environment related events over the last 3 years = **227** events
