Description:

Based on its responsibility to reduce greenhouse gas emissions resulting from fossil fuels, Tanta University has adopted several procedures and policies to encourage the use of zero-emission vehicles on campus. All Tanta University campuses are cyclist and pedestrian friendly.

There are many vehicle-free paths for these users. There is a speed limit on all internal roads, and cycle paths inside the university's campuses. All university campuses have cycle racks.

The University encourages cycling through several services, events, and groups. Tanta University supports and provides zero emission shuttle service for campus population. Also, Tanta University supports riding electric cars in campus.
